

HEALING HEARTS

Name of Game: Pain Glory

- Cancer patients and caregivers
- Age: 16 to 60 years old (can be played by anyone who is young at heart/those without motion sickness)

Learning and understanding common symptoms experienced in cancer care and how to manage them. The first stage will address the most common symptoms (i.e.: pain) encountered in cancer care. Subsequent stages will address the other symptoms (e.g., shortness of breath, nausea/vomiting, confusion/agitation, etc...). The game having a time limit for all the quests to reflect that we are dealing with patients with limited life span and symptom control needs to be managed quickly to allow for good quality of life.

- Understand pain management in cancer care as different types of pain requires different management.
